Bonita Springs, FL 34135

Ref: Mediterra Lakes/ Cane Toad Tadpole Control

Date of Visit: Tadpole Inspections on Friday, March 25th, 2022

Summary of Visits: We had a crew in Mediterra to inspect the lakes for Cane toad tadpole removal. The map below will show the active lakes that we will continue to monitor. The other lakes were looking good so far. We are expecting tadpoles to continue to emerge throughout April. We ask if residents report tadpoles, please let us know the location right away so we can have a Wildlife Technician inspect. There has been an estimate of 6 gallons of Cane toad tadpoles removed from the lakes throughout Mediterra. There were also eggs found and removed.

Invoice attached.
